

22nd March 2012

**Redimix Concrete
18-20 Armstrong Street
Tamworth. N.S.W**

Attention: Mr James McDonald

Dear James

Re: Business Reference for the concrete supply at Bunning's Tamworth.

Further to the work carried out between Redimix concrete and Adco Constructions we would like to state our appreciation for the service provided to Adco during the construction period at Bunning's Tamworth.

The concrete supplied from Redimix came to approx 4000 mtr 3 during a period from late September 2011 through to 30th Jan 2012. From a construction perspective the concrete supplied throughout the project, largely is of highly specialised nature, specifically designed for a specialised finish. It had undergone extensive design reviews and had to meet a highly controlled quality assurance criteria.

Redimix and especially James McDonald, provided Adco with exceptional service, commitment and professionalism from the outset of our working relationship which continued right through to the completion of the project. Redimix demonstrated that it has the ability to provide the local industry with a product that can be thoroughly quality controlled and meet the strict supply demands of a large commercial building site in excess of 400mtr3 of concrete per day.

We are glad to say that we experienced no issues during this period both from supply and delivery and would be confident to say that should an issue had arisen this would have been handled in a very professional manner.

Should your company require us in the future to provide reassurance to another customer that may be considering your services, we would be more than willing to satisfy any concerns they may have.

Yours faithfully
ADCO Constructions Pty Limited
Adam Clarke
