To Whom It May Concern

Commercial Reference for Redimix Concrete, Tamworth

I have worked closely with Redimix Concrete since their inception in 2009 whilst working with National Buildplan Group as the Chief Operating Officer and more recently as Managing Director of Clarin Developments Pty Ltd. They have supplied concrete to literally dozens of projects I have been involved in running, the quantities involved over that period would be 3000m³+ of various strengths and specifications,. The sizes of the pours ranging from 2 - 3 m³ through to 200 - 300m³ . The level of service and consideration as to the challenges and limitations experienced during pours be they large or small is a quality I have noticed that sets Redimix apart in the market. Their approach is that of a genuine stakeholder in the process and the Redimix Management are very involved to ensure the best possible outcomes are achieved, which makes them a standout in the market.

The quality of the product has been very good, specification and mix requirements are closely monitored and quality assured by the Redimix System which is comprehensive and capable of meeting the requirements of government project practices as well as dovetailing into those systems head contractors / clients have in place which meet or exceed ISO 9001 accreditation assurance for Quality Management.

Their ability to accommodate all sizes of pours and timeliness in delivery / turnaround times, coupled with the high level of communication and cooperation from Plant Staff, Drivers and management make the experience in working with the Redimix organisation easy and makes them an important part in the success of our projects.

It is without reservation that I provide a commercial reference for Redimix Concrete and I would be more than happy to be contacted directly to discuss this matter further.

Regards
